PROFESSIONAL SUMMARY:

I am Saif Ali, a PHP Laravel Developer with 2 years of experience and hands-on involvement in multiple live projects. I specialize in building secure, efficient, and scalable web applications.

AREAS OF EXPERTISE:

- ✓ Front-end & back-end web development
- ✓ Secure coding practices
- ✓ Code structure & architecture
- ✓ Team workflows
- ✓ Web performance optimization
- ✓ Source control
- ✓ Programming languages
- ✓ Test driven development

PROFESSIONAL EXPERIENCE:

WebCrazier

PHP Laravel Development | 10 August, 2025 - Present

- Built and delivered multiple live and practice projects in PHP Laravel
- Developed a full-featured Attendance Portal as a flagship project
- Perform live demos to customers and nurture client relationships
- PHP Laravel Developer with experience in live and dummy projects, specializing in attendance and management systems

ExlonTech

InterShip PHP Laravel Development | 10 January, 2025 - 05 August, 2025

- Completed a PHP Laravel development internship at Exlon Tech, working on real-world tasks and gaining hands-on experience in backend development, database handling, and MVC architecture
- Hands-on experience with Laravel architecture, authentication, and database design
- Strong practical knowledge of Laravel gained through real-world project development

RELEVANT PROJECTS:

WebCrazier

Attendance Portal | 05 September, 2025 - 10 October, 2025

- Developed an advanced Attendance Management System using PHP Laravel, where attendance is marked only after IP address and geo-location verification, with automatic salary generation, leave management, and auto-deduction of salary for absences and unpaid leaves.

WebCrazier

School Managment System | 20, October 2025 - 26 November, 2025

- Developed a School Management Portal using PHP Laravel, enabling student registration, class management, result generation, and complete handling of school-related operations through a centralized system.
